

Product Code: YL-3535F-C7H10040R0

ABSOLUTE MAXIMUM RATING (T_j= 25 °C)

Characteristics	Value	Unit
DC Forward Current	1500	mA
Power Dissipation	5.1	W
DC Reverse Voltage	5	V
Storage Temperature	-40 ~ 125	°C
Operating Temperature	-40 ~ 125	°C
LED Junction Temperature	150	°C

PRODUCT CHARACTERISTICS

CAUTIONS

1. Moisture Sensitivity

In testing, YesLED has found 3535 LEDs to have 1 year floor life in condition $\leq 30^{\circ}\text{C}$ / 60% relative humidity (RH). Moisture testing included a 168-hr soak at $85^{\circ}\text{C}/60\%$ RH followed by 3 times reflow cycles, with visual and electrical inspections at each stage.

YesLED recommends keeping 3535 LEDs in their sealed moisture-barrier packaging until immediately prior to use. YesLED also recommends returning any unusual LEDs to the re-sealable moisture-barrier bag and closing the bag immediately after use.

2. Handling Precautions

Do not handle LEDs with bare hands, it may contaminate the LED surface and affect optical characteristics. In the worst case, catastrophic failure from excess pressure through wire-bond breaks and package damage may result.

Do not stack assembled PCBs together. Failure to comply can cause the resin portion of the product to be cut, chipped, delaminated and/or deformed. It may cause wire to break, leading to catastrophic failures.

3. Eye safety

Warning: do not look at exposed lamp in operation. Eye injury can result.

4. Static Electricity

Wristbands and anti-electrostatic gloves are strongly recommended and all devices, equipment and machinery must be properly grounded when handling the LEDs, which are sensitive against static electricity and surge.

Precautions are to be taken against surge voltage to the equipment that mounts the LEDs. Unusual characteristics such as significant increase of current leakage, decrease of turn-on voltage or non-operation at a low current can occur when the LED is damaged.
